MODEL TABLE NOTES:

Specifications are affected by the condition of the vehicle and how it is equipped, as well as the nature and condition of the operating area. Inform your dealer of the nature and condition of the intended operating area when purchasing your Hyster® truck.

- (1) Top of forks
- (2) Without load backrest
- (3) h₆ subject to +/- 5 mm tolerance. H2.0FT - H2.5FT add 25mm when front tyre size 28X9-15 is selected
- (4) Full suspension seat in depressed position.
- (5) Standard/Wide/Dual. When wet axle selected values are (1186 / 1321 / 1601) for all capacities
- (6) add 32mm with load backrest
- (7) At 1.6km/h
- (8) At 4.8km/h
- (9) With Load Sensing Hydraulics
- (10) Variable
- (11) L_{PAZ}, measured according to the test cycles and based on the weighting values contained in EN12053

MAST CAPACITY TABLE NOTES:

- (1) With load backrest
- (2) Without load backrest
- (3) Wide tread or Dual Drive Wheels required for this rating
- (4) Dual Drive Wheels required for this rating

NOTICE:

Care must be exercised when handling elevated loads. Operators must be trained and must read, understand and follow the instructions contained in the Operating Manual.

All values are nominal values and they are subject to tolerances. For further information, please contact the manufacturer.

Hyster products are subject to change without notice.

Lift trucks illustrated may feature optional equipment. Values may vary with alternative configurations.

 **Safety:** This truck conforms to the current EU requirements.

Specification data is based on VDI 2198.

RATED CAPACITIES

STANDARD CARRIAGE

Load centre - distance from front of forks to centre of gravity of load.

SIDESHIFT CARRIAGE

Rated load - based on vertical mast.

PRODUCT FEATURES

As the first choice materials handling partner for the world's demanding operations, Hyster delivers value added solutions and dependable products through the strongest distribution network in the industry.

The Fortens™ range offers a highly configurable truck from the dependable Fortens with a Powershift transmission to the extremely productive Fortens™ Advance+ truck which combines the unique and patented DuraMatch™ transmission with quiet and efficient Kubota engines. Quiet roomy cabs with air suspension seats, TouchPoint™ mini levers and a host of operator support features make Fortens the right choice to keep operators comfortable and productive over long shifts, its low fuel consumption, reliability and serviceability make it the right business choice. **Hyster Fortens™ - the solution to your application needs.**

Protected Powertrain

The durable powertrain is computer controlled, protected and managed by the Pacesetter™ VSM electronic management system, featuring a CANbus communications network. The VSM ensures maximum uptime and dependability, as it allows for fast and accurate trouble-shooting, facilitates first-time fixes and can help to minimise costly "parts swapping".

DuraMatch™ - The World's Most Advanced Powershift Transmission

The electronically controlled DuraMatch™ transmissions provide smoother directional changes to eliminate shock loading and extend the life of the clutch packs. These transmissions offer unique and patented features, managed by the VSM, such as the Auto Deceleration System, which contributes to extending brake and tyre life and so reduces the frequency of required changes and ultimately your overall operating costs.

Autospeed Hydraulics

If the Autospeed Hydraulics option is selected when lifting a load the engine speed is automatically increased to provide full hydraulic power. The Pacesetter VSM maintains the current travel speed (or prevents travel) until the operator steps on the accelerator.

No operator inching is required and productivity and efficiency is increased by simplifying operator actions.

Hassle-Free Electrical & Hydraulic Systems

The CANbus system ensures reliable operation of the truck, providing reduced wiring complexity and keeps them away from heat sources. Nonmechanical, Hall-Effect sensors and switches are environmentally sealed to IP66 standards to keep out water and debris (allowing the truck to be pressure washable) and are designed to outlast the life of the truck. The Hyster Fortens™ is equipped with hassle-free hydraulic systems, featuring Leak-free O-ring face seal fittings which reduce leaks for enhanced reliability.

More Dependable in Demanding Applications

A choice of aluminium core radiators and a superior counterweight tunnel design coupled with a "pusher" type fan provide the industry's best cooling, ensuring that the truck operates at lower temperatures, which results in increased component life and limits the risk of overheating, particularly in heavy duty applications. In addition, the long term durability of the truck is enhanced by the available powertrain protection systems.

High-performance In-tank Hydraulic Filter

Superior filtration system increases life span of all hydraulic components such as hoses and pumps.

Significant savings in ownership costs per lift truck – each year

The Hyster Fortens™ has been designed to help you lower your ownership costs in all types of applications, through offering a wide range of engine and transmission options to suit the application need. In head-to-head comparisons with the leading competitors' comparable trucks, the Fortens™ range was shown to offer significant annual savings in operating consumable costs, such as fuel efficiency, longer tyre life, reduced brake wear and decreased service time, which results in the lowest cost per load moved.

STRONG PARTNERS. TOUGH TRUCKS.™

FOR DEMANDING OPERATIONS, EVERYWHERE.

Hyster® supplies a complete range of warehouse equipment, IC and electric counterbalanced trucks, container handlers and reach stackers. Hyster® is committed to being much more than a lift truck supplier.

Our aim is to offer a complete partnership capable of responding to the full spectrum of material handling issues: whether you need professional consultancy on your fleet management, fully qualified service support, or reliable parts supply, you can depend on Hyster®.

Our network of highly trained dealers provides expert, responsive local support. They can offer cost-effective finance packages and introduce effectively managed maintenance programmes to ensure that you get the best possible value. Our business is dealing with your material handling needs so you can focus on the success of your business today and in the future.
